

FROST & SULLIVAN

FROST DIGITAL VENTURES

Transforming Growth Through Digital, AI, and Execution Excellence

YOUR PARTNER IN DIGITIZATION

At Frost Digital Ventures, we are committed to driving digital transformation in the BFSI industry. We believe that every financial institution can achieve success by embracing strategic digital advancements that enhance efficiency, security, and customer experience.

Our role is to bridge the gap between banks and world-class software and service providers who deliver cutting-edge solutions. From core banking upgrades to AI-driven automation, we connect institutions with the right partners to ensure seamless and impactful innovation.

Whatever your bank needs, we're here to help. With our network of trusted industry experts, we provide tailored solutions to support your digital journey. Let's work together to build a stronger, more future-ready financial sector

Frost Digital Ventures is a Proud Member of

The Philippines' leading and largest digital trade organization comprised of startups and unicorns collectively generating over 90% of digital-initiated transactions volume in the country today.

AAP is the national industry body advancing responsible and ethical AI and analytics adoption across sectors. It brings together industry, government, and academia to build talent, set standards, and shape the country's AI ecosystem.

What does Frost Digital Ventures do?

We're a boutique technology consulting and implementation firm backed by an exceptional advisory board with 200+ years of collective experience in global banking, finance, and technology solutions.

With deep market insights, local industry expertise, and a strong network, we extend our partners' sales efforts, allowing them to enter previously inaccessible markets.

Our methodical approach entails completely analyzing our partners' offerings, establishing customized marketing strategies, generating leads, and overseeing the entire sales process from beginning to end.

We prioritize commitment to both clients and partners throughout the journey.

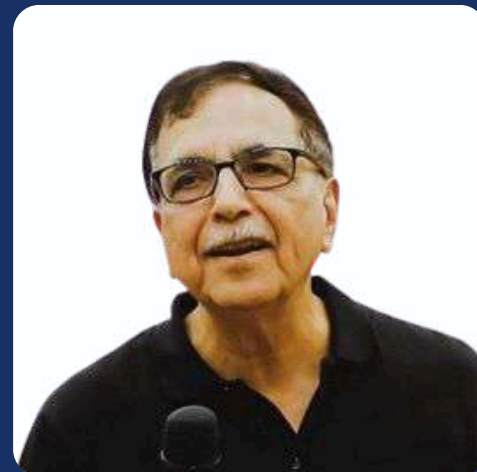

Our Strategic Team

We set direction and keep execution aligned from planning through delivery. We translate your business goals into a clear strategy and a practical roadmap. We provide leadership oversight and delivery governance so decisions stay fast and progress stays on track. For you, this means confident execution and measurable outcomes.

Our Alliances

To ensure that we have the furthest reach in to our market, we engage with many of the major industry advisors, consultancies and system integrators. We attend local conferences and events to stay on top of what's happening in the market. Each year we run a few events with partners, inviting targeted audiences, who are the buyers and influencers in their businesses. We stay on top of what's happening locally through our network of alliances and other relevant industry news resources.

Enhance Efficiency, Beat Fraud & Protect Reputation with KYC Solutions

Scale globally with ease

- Expand your business globally
- Stay compliant when onboarding users
- Maximize conversions at each step

Stop fraudsters right at the entry

- Reduce frauds using database check, liveness, quality checks etc.
- Conduct de-duplication to prevent repeat fraudsters
- Protect brand reputation & customer trust

Reduce drop-Offs with instant KYC verification

- Users can be verified instantly, in under 30 seconds
- High straight-through processing with a market-leading, high-accuracy solution
- Automated fallback option to navigate downtimes

End-to-end identity verification tailor made for financial services

AI-powered solutions that eliminate manual work and accelerate your business.

Reduce Manual Hours

Automate your KYC using best-in-class AI technology & verify users in 3 seconds.

Maximise Conversions

Reduce drop-offs with a pass-through rate of 95% and minimal verification steps.

Outsmart Bad Actors

Screen users against global local databases, PEP, watchlists & adverse media.

Protect your Reputation

Safeguard your financial resources against costly non-compliance penalties.

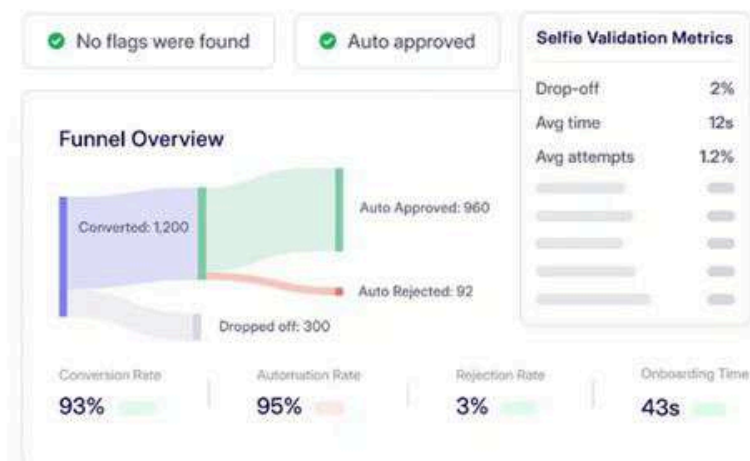

Take data-driven decisions

Analyse user journey in a Single Platform, empowered with easily Customizable Filtering Options.

Monitor conversion rates, drop-off stage, pass rates and time taken to complete the verification.

IntentAI

The Intent platform is designed for Enterprises and Agencies seeking to run AI Agents across multiple entities

At IntentAI, we believe that machines should understand you, and not the other way around.

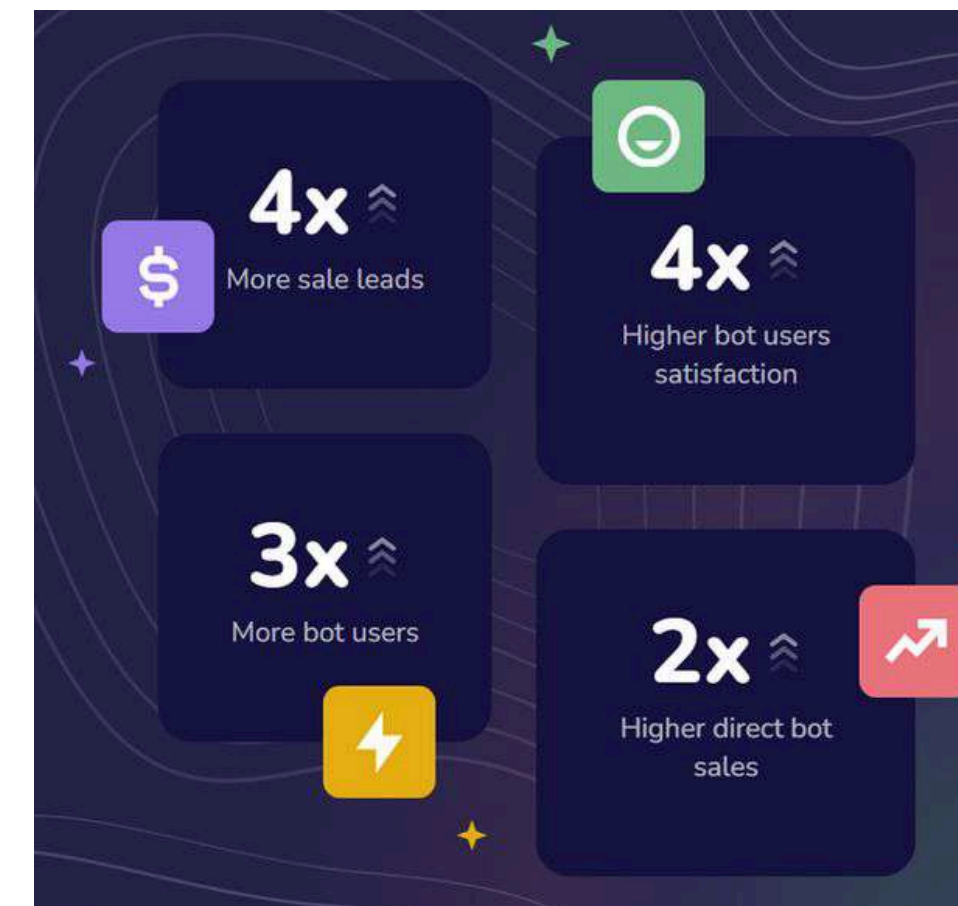

We develop and train human-like Enterprise GenAI bots to help clients in the financial and healthcare industries.

Our first and foremost priority is to understand what clients want, that is, their intent. From there, our bots respond, advise, and nudge users. They also behave like agents, retrieving real-time information, performing transactions or simply escalating to more qualified agents

INT:NT

Launch AI Agents everywhere all at once

Experience a GenAI bot platform that works in the Cloud or on-premise, serving as many tenants and bots as you want.

Posidex

The MDM platform that helps you discover more about your customers

Designed to enhance customer understanding and service. One platform that supports all business requirements and the entire customer lifecycle. Unlike traditional MDMs that struggle with real-time scalability, data accuracy, and privacy compliance, PrimeMDM is purpose-built for today's demands.

PII Data Vault - With rising concerns on protection against cyber attacks and data breaches, privacy concerns, evolving global regulations, and increasing scrutiny on cross-border data flows, organizations need more than just traditional encryption. They need a smarter, secure-processing approach to protect PII without compromising usability.

Carving our legacy in the evolution of customer data

For over 21 years, we've been enabling leading brands with possibilities by revolutionizing the strategic use of customer data.

TCS BaNCS™

Enterprise-grade digital core banking platform

TCS BaNCS is a comprehensive global banking platform designed to support retail, corporate, transaction, and digital banking operations at scale. Built to serve complex financial institutions, it enables banks to modernize core systems while maintaining stability, regulatory compliance, and operational resilience.

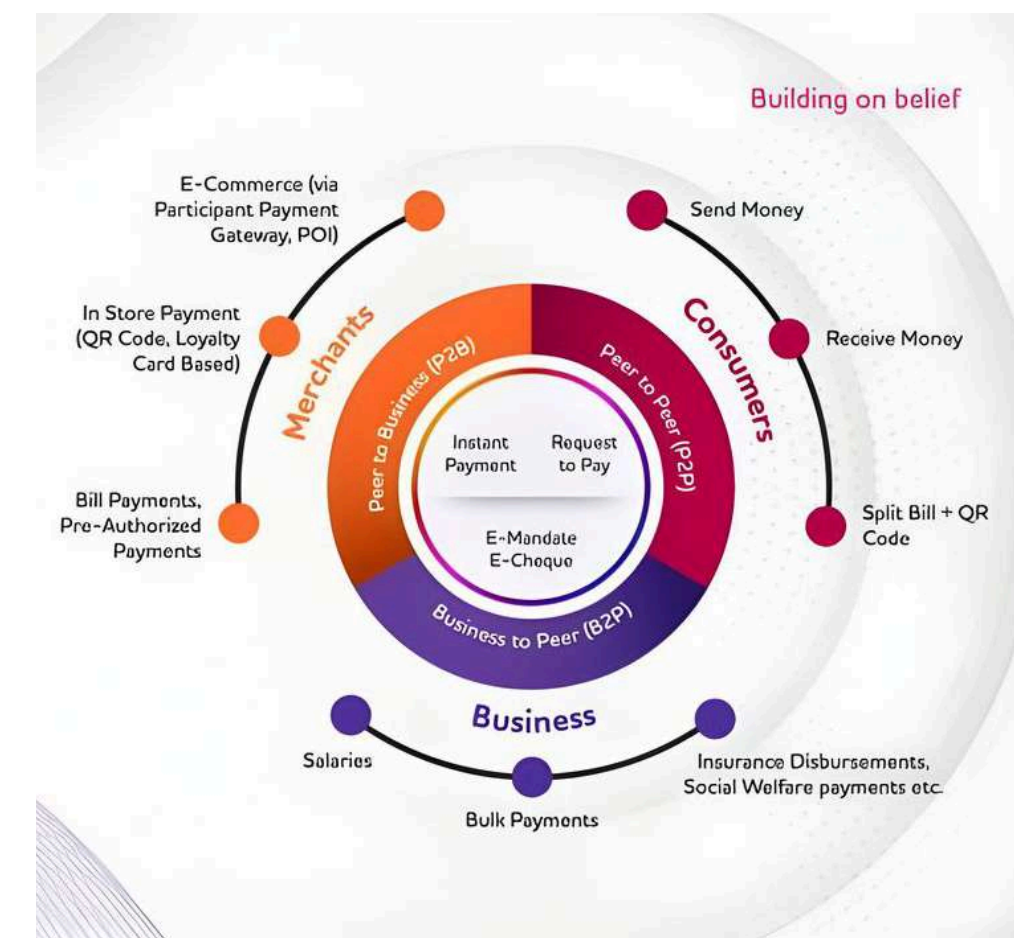

TCS BaNCS was recognized for its transformative capabilities in clearing and settlement operations – especially its contribution toward the move to shorter, T+1 settlement through disruptive technologies, streamlined workflows, and collaborative innovation.

Powering scalable, secure, and future-ready banking operations.

Supporting end-to-end banking operations, including customer onboarding, account management, payments, lending, and treasury, through a modular and scalable core banking platform that enables banks to modernize legacy systems and operate confidently across markets.

PureSoftware

Arttha- Making Banking as a Service Seamless, Real-Time, and Transparent

Arttha, the flagship product of PureSoftware, is one of the fastest-growing unified banking platform reshaping and reinventing banking with the agility of fintech. Arttha is an omni-channel, cloud-ready platform based on a completely modular and microservices architecture. It has been uniquely offering value propositions, such as Core Banking for Virtual Banks, Digital Wallet & Payment Solutions, Loan Lifecycle Management, Merchant Management, and Agency Banking.

Empowering Businesses with Powerful Digital Experiences

We deliver digital excellence driven by next-gen solutions and strong partnerships globally.

Loan Lifecycle Management

A future-ready and flexible loan lifecycle management solution turning lending into a quick, painless process and enables lenders to sustain customer-centric digital experiences at scale.

Digital Wallet & Payments

A Digital Wallet and Payments solution you can bank on for the connectivity, scalability, and flexibility you need to thrive in the increasingly demanding and fast-moving payments market.

Digital Omnichannel Banking

Build a successful omni-channel strategy focused on customers, engage them effectively, and deliver a delightful digital banking experience wherever they want.

Cloud Native Core Banking

Take your core banking to cloud and empower your customers with greater freedom to transact globally.

Merchant Management

A powerful Merchant Management solution that allows banks and fintech firms to onboard and manage their merchant relationships seamlessly.

Agency Banking

Arttha Agency Banking is powering banks to reduce operational costs and accelerate financial inclusion by delivering simplified branchless banking services to the unbanked and the underbanked.

BNPL platform

Arttha BNPL platform powers instant finance through Point-of-Sale and BNPL financing solution that helps boost sales and average order value.

Moneythor

Personalized digital banking engagement platform

Moneythor is a personalization and customer engagement platform designed for digital banking environments. It helps financial institutions transform customer data into actionable insights that drive relevant, timely, and contextual digital interactions across channels.

Capabilities

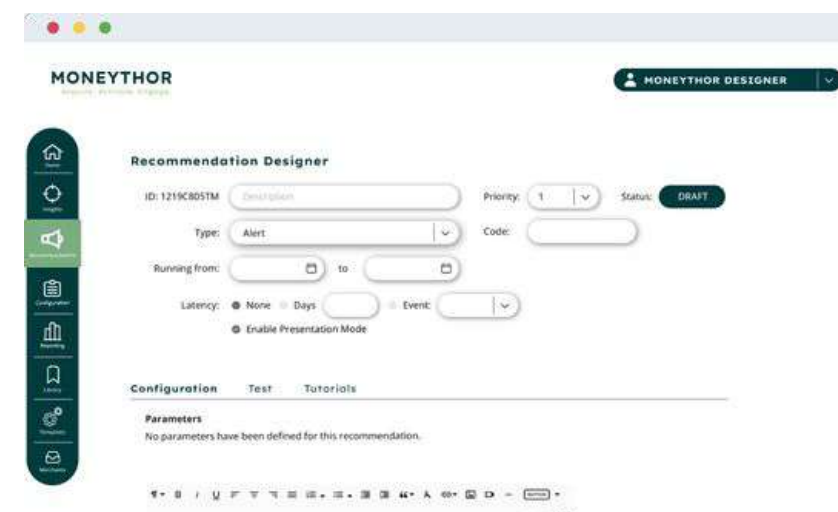

- Customer Data Analytics
- Personalization & Recommendations
- Rules & Decision Engine
- Omnichannel Engagement
- Integration with Core & Digital Platforms

MONEYTHOR

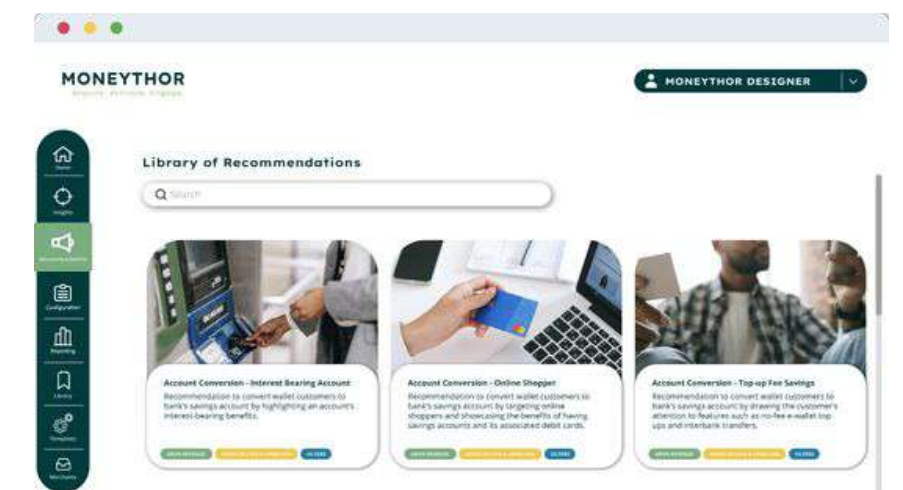

Acquire. Activate. Engage.

Driving intelligent customer experiences through data-led insights.

By combining analytics, behavioral insights, and decision intelligence, Moneythor enables banks to deliver personalized recommendations, contextual nudges, and digital financial guidance that enhance customer engagement and long-term value across digital channels.

Fully Configurable Solution

Library of
Pre-Built Use Cases

Finartis

Prospero Suite : Our complete front-to-back solution

Our modular, multi-channel front-to-back solution will let you focus on areas where you can add most value right from the start.

Prospero comes with a full range of front, middle and back-office features. Its modules are delivered ready-to-use, easy to set up and user-oriented. This allows users to focus on the areas where they can add most value: strategy, investment performance and building strong client relationships right from the start.

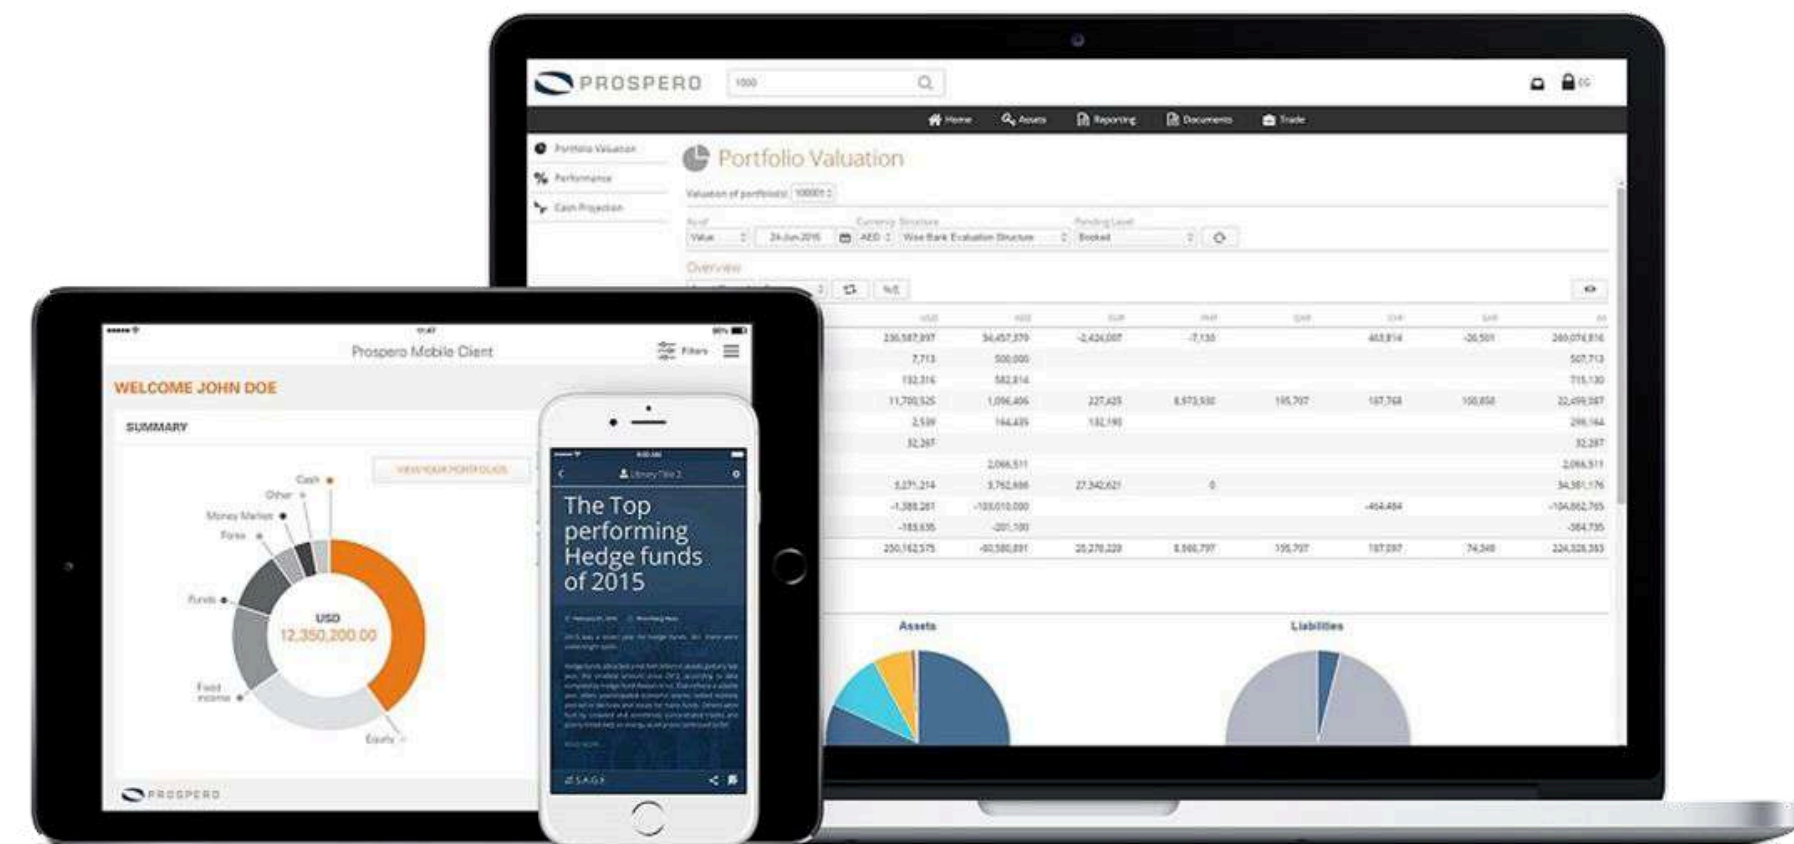

Prospero Mobile App is a versatile multi-channel platform, which has been designed to be accessed anywhere: tablets, mobiles or laptops offer the same accessible interface. Our digital solution provides your customers with a unique digital experience. Our solutions have drawn their inspiration from best-in-industry B2C applications to offer each individual customer the transparent and tailored investment advice they require, through a customizable multi-channel solution with a sleek interface.

We help Wealth Managers worldwide serve their clients better

At FINARTIS, we're committed to working together with you to deliver middle- and back-office operations excellence through intelligent solutions.

Provide customers with an eye-opening digital experience

Finergic

Who We Are

Disruptors. Digital Changemakers. Innovators.

Driven by passion and skill, we work with visionaries to transform financial organizations. We design, develop and implement wealth solutions with innovative technology that is impactful. With deep expertise and industry best practices gained, we take a holistic approach for end-to-end innovation and cutting-edge solutions that empowers our clients with results that align with their vision.

Together with a diverse and talented team, we collaborate with our clients to create exceptional solutions.

Wealth Solution expertise you trust. Service you deserve.

We take a holistic approach in defining end-to-end solution embracing the latest technology and create great user experiences for our clients, their customers and partners thereby adding business value.

We are 80 people strong.
ALL these people have >12 years of deep experience with Temenos products thus our focus on Temenos Clients and their need to Upgrade

Why Solutions?
We have developed proprietary software called the Finergic Impact Assessment Tool (FIAT) that significantly reduces Time, Effort, Cost and Risk of Upgrades & Migrations

We can help you by defining all change up-front creating a predictable low-risk outcome for the Upgrade

We deliver a Test-Ready Technical Upgrade in 8 Weeks along with a Discovery Impact Assessment of ALL changes between your Production Release and the Target Release

APIX

Collaborate to Innovate

We're on a mission to enable growth for the financial services sector by accelerating innovation and digitisation.

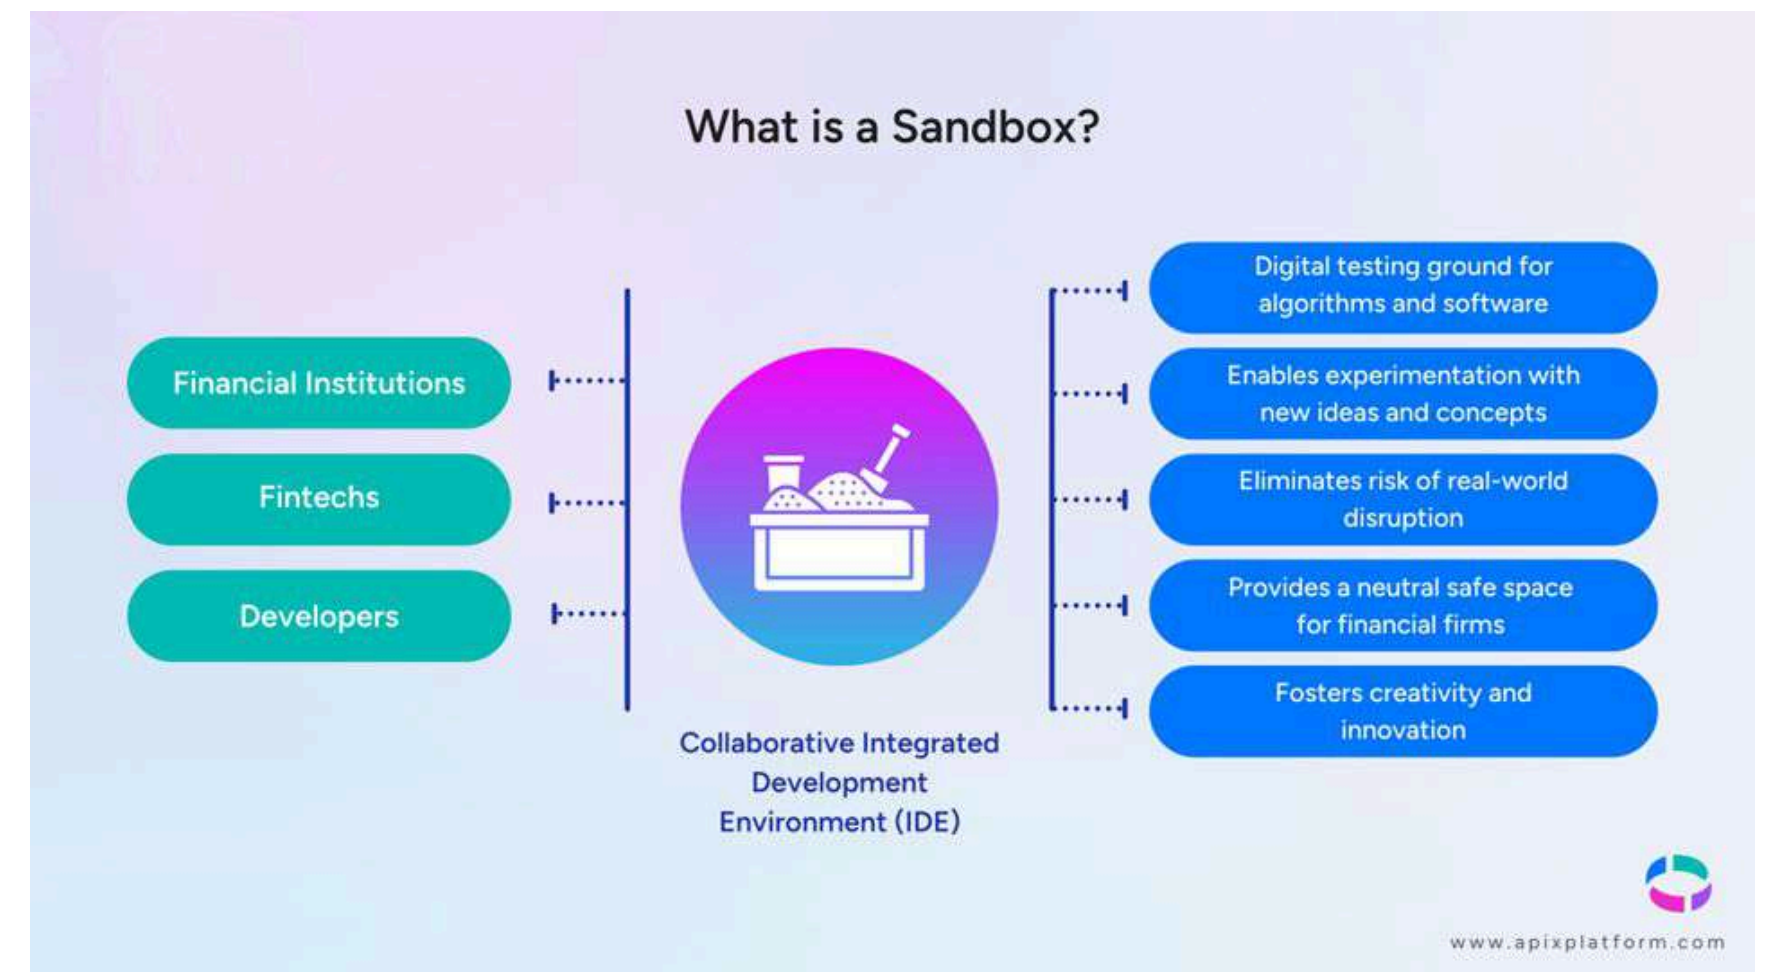

APIX is purpose-built to transform and simplify the collaboration journey between financial institutions (FI) and fintechs. We are the first cross-border, open-architecture, collaborative innovation platform with sandbox and API marketplace capabilities.

As the bridge that connects FIs and fintechs like no one else can, our dynamic ecosystem aims to accelerate innovation and digital transformation, thus unlocking endless possibilities to craft stronger value propositions. APIX allows FIs to search for and discover innovative, digital solutions from fintechs and then rapidly design, experiment and deploy these solutions.

Innovation Platform As a Service

We empower Financial Institutions to accelerate their innovation journey through collaboration with fintechs and innovators from over 100 countries

Yappes

Yappes **API Manager** is a full featured GUI to manage the entire API lifecycle, including on-boarding of APIs, defining policies and subscriptions, publishing APIs to the Marketplace etc.

API Lifecycle

Design, Test, Deploy, Manage, Monetize your APIs. Manage your APIs from inception to decommission. Designed to work seamlessly.

API Gateway

Scalable, performant and secure API Gateway.

Internal / External Marketplace

Full self-service Developer Portal for monetized and free APIs. Flexible pricing plans. Track utilization against subscription. Auto publishing of APIs to the Portal.

Monetization

Create flexible pricing plans for APIs and publish them to the Marketplace. Consumers can subscribe, track usage and make payments on the platform itself.

A modern B2B platform for all things API

Yappes is a unified API Management Platform that empowers organizations to seamlessly design, deploy, manage, secure, and monetize APIs—all in one place. Built on a Zero Trust architecture, Yappes ensures every interaction is continuously authenticated and authorized, providing enterprise-grade security and governance across the API lifecycle

Monitoring and analytics

Built-in comprehensive observability, flexible and customizable analytics using best of breed technologies and escalation manager.

Security

Fully self-contained product for ultimate privacy. Multiple authentication methods and protocols. RBAC and audit trail of activities. Tested and certified for security vulnerabilities.

Loylty Rewardz

Deliver customer delight, get measurable business outcomes

Banks and financial services have long customer lifecycles, but engagement is sporadic, transactional, and unsustainable. Our end-to-end loyalty solutions are designed to help engage with customers throughout their journey, addressing preferences and overcoming challenges like high churn and dormancy along the way. What you get are enriched relationships where you understand customers better and customers contribute to your growth.

Leading transformation in customer engagement with insights, technology and passion

We empower Financial Institutions to accelerate their innovation journey through collaboration with fintechs and innovators from over 100 countries

Gain competitive advantage with personalized rewards, a flexible program structure and differentiated offerings for your customers.

Cross-sell and upsell products and services with an enterprise-wide loyalty program that rewards customers however they engage with you.

Increase customer stickiness with targeted and timely communication, tactical offers, and relevant rewards that keep customers coming back for more.

Drive customer value by incentivizing customers for the right actions and transactions, thereby driving incremental revenue for your business.

Delight customers with real-time rewards and tier upgrades when they complete both actions and transactions.

Get complete control over gratification with cost-control measures and our expert advice.

Questronix

Reasons for Digital Transformation

QNX offers innovative and comprehensive tech solutions and services designed to help businesses thrive in the digital age.

Partnerships

Strong business partners are vital amidst the growing competitive market. Digital Transformation adds efficiency to all partner interactions.

Security

Digital transformation lets you operate worry-free through easy compliance with all government mandated policies.

We don't just sell products. We provide solutions.

One of the largest tech solutions providers and systems integrators in the Philippines, Questronix offers only the best breed of solutions that are tested, proven mature, and are globally recognized.

GBG

Customer intelligence that builds trust

GBG organizes its product portfolio across three core domains that support trusted digital interactions and risk-aware decision-making.

- **Verify Identity** - Focuses on accurately confirming customer identities through digital and document-based verification during onboarding and lifecycle events.
- **Assess Risk** - Enables organizations to evaluate identity, transaction, and behavioral risk in real time, supporting informed decisions and regulatory compliance.
- **Protect Against Fraud** - Helps detect and prevent fraudulent activity across channels by identifying suspicious patterns, anomalies, and emerging threats.

Identity experts helping organizations verify, protect, and grow.

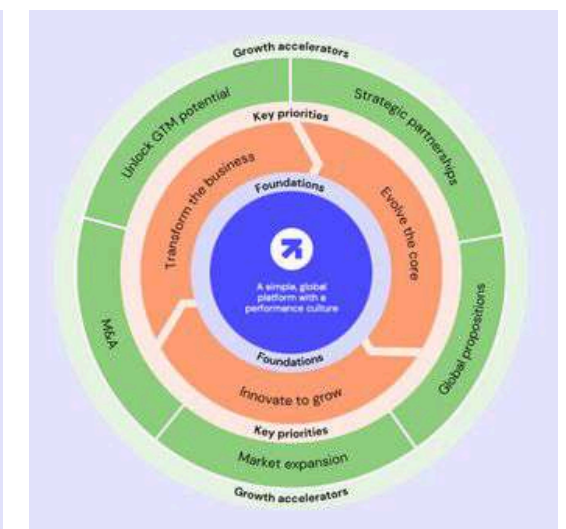

GBG provides customer intelligence solutions that enable secure identity verification, fraud prevention, and trusted digital interactions. GBG helps organizations onboard customers faster while maintaining strong risk controls in increasingly digital environments.

Transform the business

Evolve the Core

Innovate to Grow

Credio

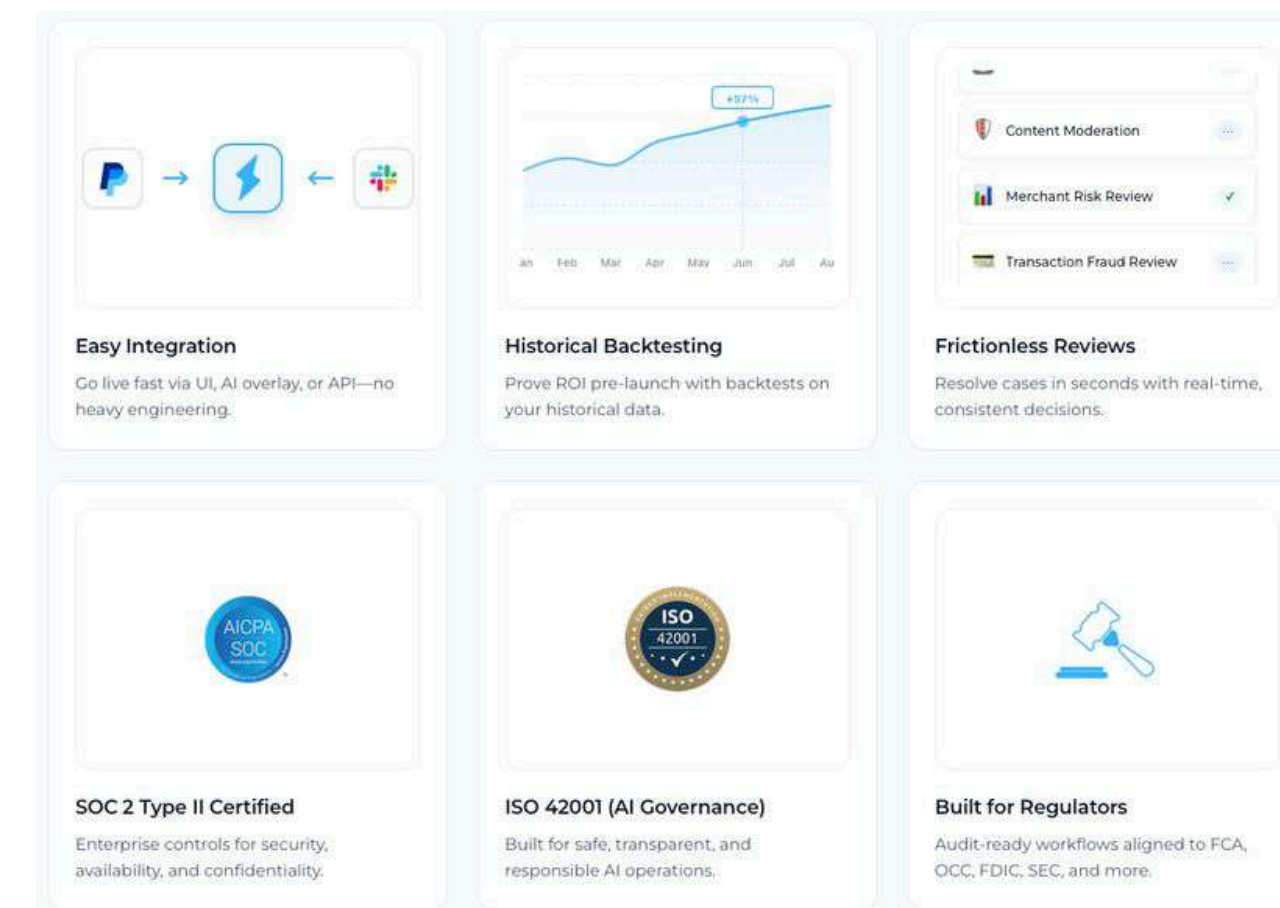

AI-powered intelligence for frontline compliance

Its capabilities include AI-driven risk detection, regulatory intelligence, and compliance workflow augmentation. Credio's solutions support real-time monitoring and operational compliance across regulated industries. Delivered as part of Frost Digital Ventures' compliance offerings, Credio helps organizations move from reactive compliance to proactive risk management.

Transforming compliance through real-time insight.

Credio uses AI to help frontline teams identify and act on regulatory risks by turning complex compliance signals into actionable intelligence, reducing manual effort and decision delays.

Flagright

Modern financial crime compliance

Flagright's capabilities include transaction monitoring, AML, fraud detection, and risk analytics. Its solutions are designed to scale with modern financial ecosystems while supporting regulatory reporting and investigation workflows. Integrated by Frost Digital Ventures, Flagright strengthens financial crime controls without compromising operational efficiency.

The G2 Badge - High Performer 2025 is an industry recognition awarded by G2, a leading software review and comparison platform.

Flagright has been globally recognized and listed among G2's highest ranked firms.

Combating fraud and financial crime with intelligent automation.

Flagright provides advanced financial crime compliance solutions built on real-time, explainable AI. Flagright enables financial institutions to detect suspicious activity accurately while maintaining transparency and regulatory confidence.

 Transaction Monitoring A high performance scenario builder with sub-second API response times.	 Case Management Automated case management for streamlined investigations.	 AI Forensics Specialized AI agents tackling key AML compliance and fraud challenges.
 Watchlist Screening Screen individuals against watchlists using third-party data and APIs to block illicit transactions.	 Risk Scoring Dynamic risk profiling for customers and transactions in real-time based on behavioral and inherent risk factors.	

Zafin

Smarter banking through intelligent monetization

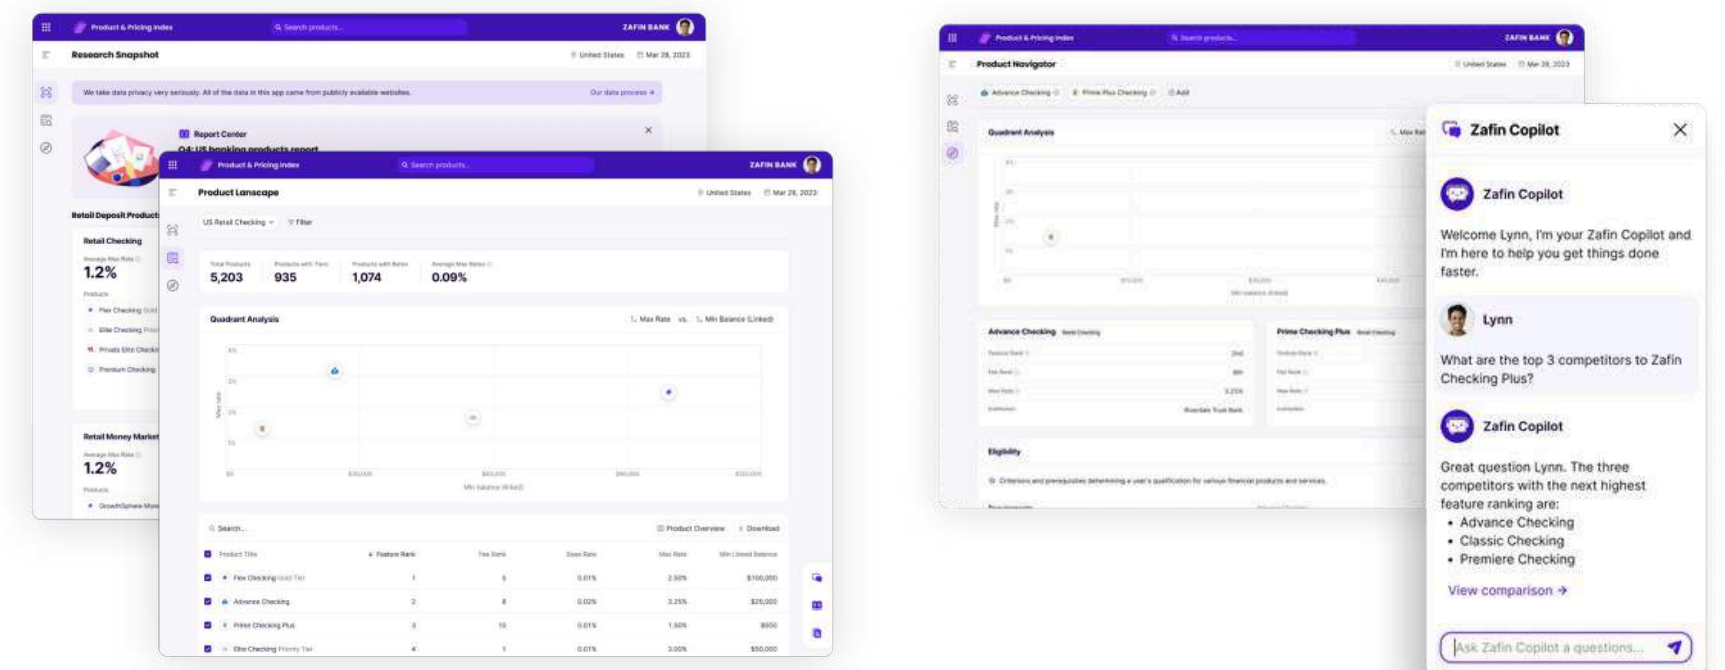

Our Capabilities

- **Product Configuration** - Defines and manages banking products across customer segments.
- **Pricing Management** - Enables flexible, rule-based pricing structures.
- **Fee Orchestration** - Automates fee calculation, application, and changes.
- **Revenue Optimization** - Analyzes pricing and usage to improve monetization.

Redefining how banks price and deliver value.

Zafin enables banks to modernize product pricing, packaging, and monetization strategies. Zafin helps financial institutions respond dynamically to customer expectations, regulatory change, and competitive pressure.

Seclore

Data security that travels with your information

- Provides data-centric security to protect sensitive information beyond the network perimeter
- Enforces persistent data protection and usage-based access controls
- Offers file and email security products with centralized policy management
- Enables visibility, tracking, and auditability of data usage
- Supports integration and implementation services for enterprise environments

SECLORE™

Protecting sensitive data wherever it goes.

Seclore delivers data-centric security solutions that protect information beyond traditional network boundaries. Seclore ensures sensitive data remains secure even when shared externally or accessed across multiple platforms.

CAS Total Solutions: TradeSmart

Digital trade finance platform for faster, compliant operations

TradeSmart is a trade finance solution designed to streamline complex, paper-heavy processes into a faster, traceable digital experience. It enables customers and banks to manage trade journeys with greater transparency, reducing turnaround time and operational friction while improving compliance and service quality.

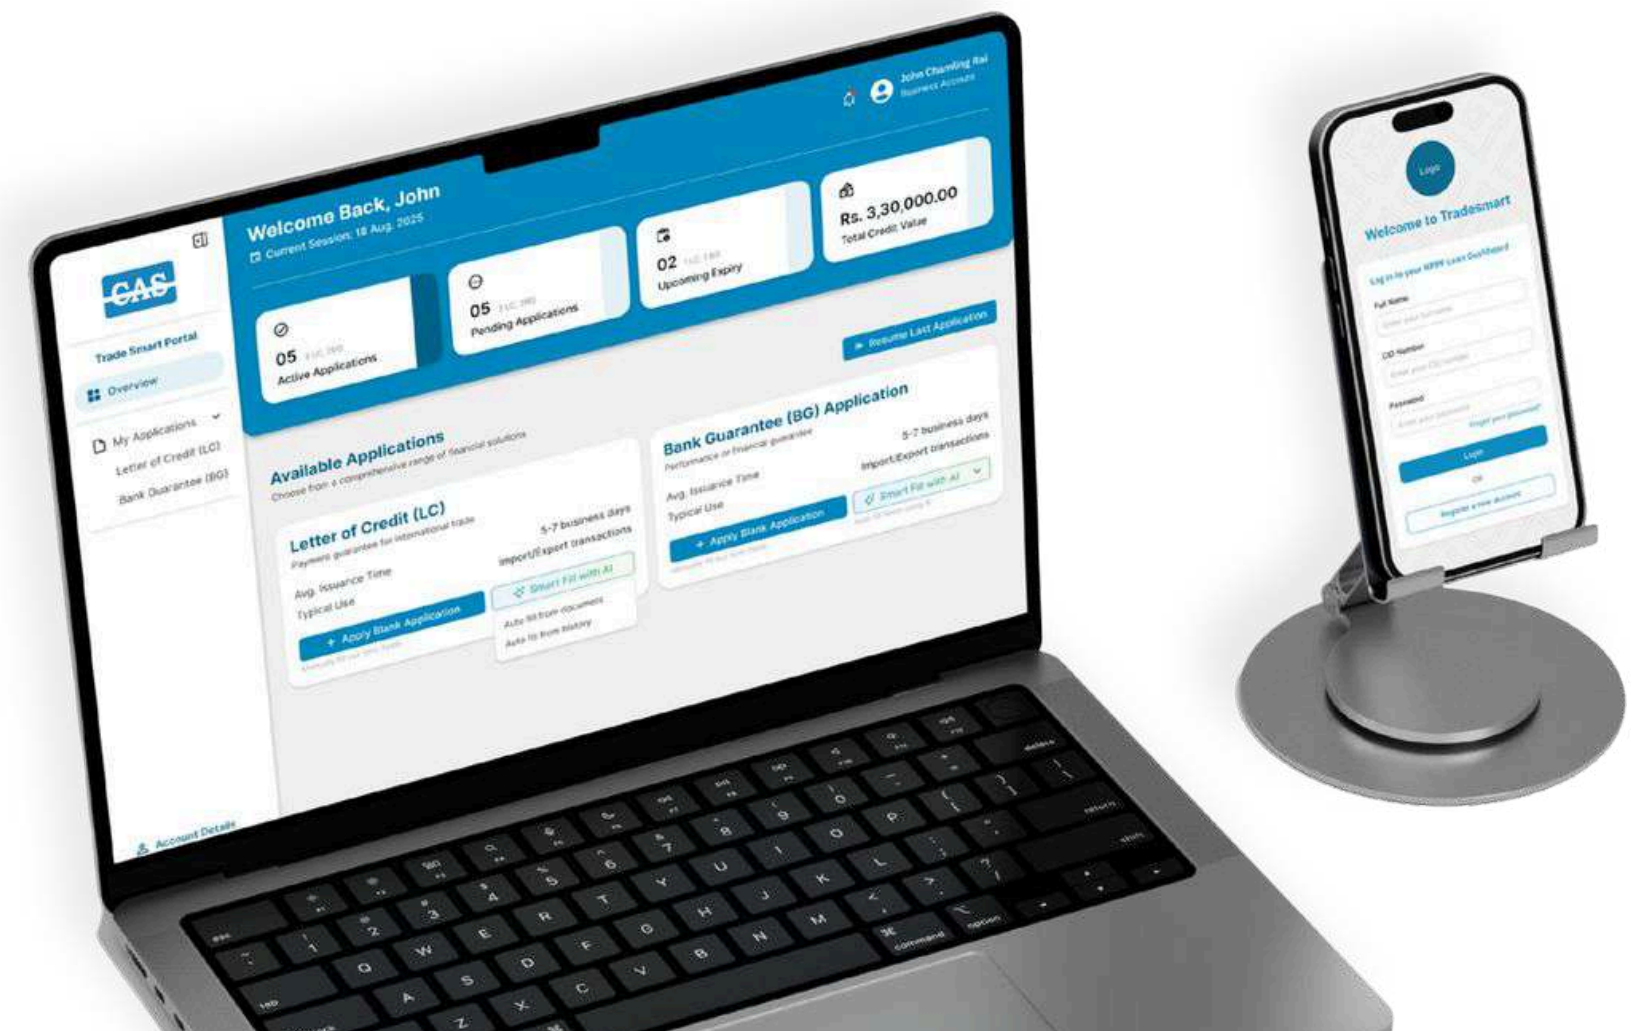

Capabilities:

- LC & BG Issuance
- Amendments & Cancellations
- Bills & Trade Correspondence
- Document Validation & Compliance
- SmartFill & Accuracy Checks
- Core Banking Integration

Modernizing LC and trade workflows with secure portals, automated validation, and end-to-end visibility.

Built on a multi-layer architecture that connects a customer portal with workflow automation and core banking integration, TradeSmart supports end-to-end journeys.

Geniusto

AI-driven automation and decision intelligence platform

Geniusto is an AI-powered automation platform designed to help organizations orchestrate complex workflows using intelligent agents. It enables enterprises to automate decision-heavy processes across operations, risk, compliance, and customer-facing functions, reducing manual effort while improving speed and consistency.

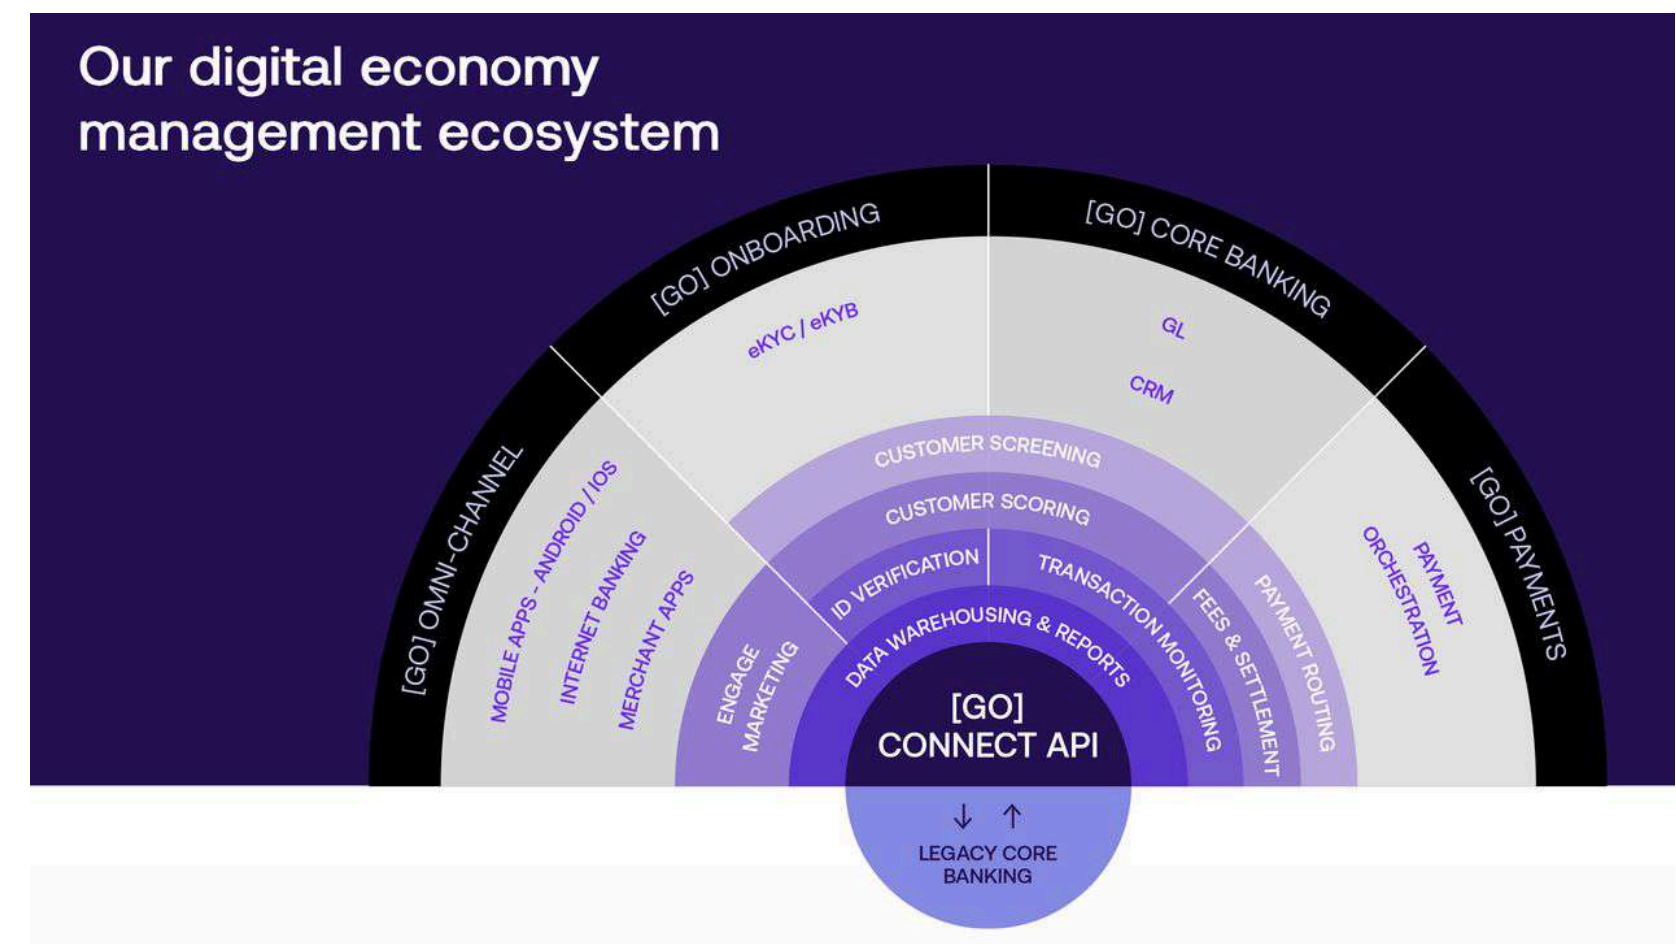

Solutions:

- **[GO] Omni-channel** – Unified digital experience across channels.
- **[GO] Onboarding** – Fast, seamless customer onboarding journeys.
- **[GO] Core Banking** – Modular core banking foundation and services.
- **[GO] Payment** – Integrated payments processing and orchestration.

Enabling intelligent operations through autonomous AI agents.

By combining large language models, rule-based logic, and system integrations, Geniusto allows organizations to deploy autonomous agents that analyze data, execute tasks, and support human decision-making. The platform is built modular to operate securely at scale.

Expleo

Global engineering, technology, and consulting services

Expleo is a global engineering and technology consulting firm that supports organizations in accelerating digital transformation, improving operational performance, and modernizing critical systems. It combines domain expertise with technology capabilities to deliver transformation across banking, automotive, aerospace, and other regulated industries.

Solutions:

- Digital Transformation & Consulting
- Quality Engineering & Testing
- Core Systems Modernization
- Cybersecurity & Compliance
- Managed Engineering Services

[expleo]

Driving transformation through innovation, quality, and operational excellence.

By integrating engineering rigor, quality assurance, and digital consulting, Expleo helps enterprises enhance customer experience, strengthen compliance, and deliver resilient, future-ready platforms. Its approach blends advisory, implementation, and managed services to ensure measurable business outcomes.

Fable Fintech

Digital banking and lending technology platform

Fable Fintech provides digital banking and lending solutions designed to help financial institutions modernize their product offerings and customer journeys. Its platforms support banks and financial service providers in launching and managing retail, SME, and digital-first financial products efficiently.

Solutions:

- Digital Lending Platform
- Loan Origination & Management
- Customer Onboarding Solutions
- SME & Retail Banking Modules
- API & Core Banking Integration

Enabling scalable, customer-centric financial services

Through configurable modules and integration capabilities, Fable Fintech enables institutions to streamline onboarding, lending, and servicing workflows. The platform supports operational efficiency while enhancing customer engagement and accessibility.

Kyriba

Cloud-based treasury and liquidity management platform

Kyriba provides a cloud-native treasury management platform that enables organizations to manage liquidity, payments, and financial risk in a centralized environment. It helps enterprises gain real-time visibility into cash positions while strengthening governance and financial control.

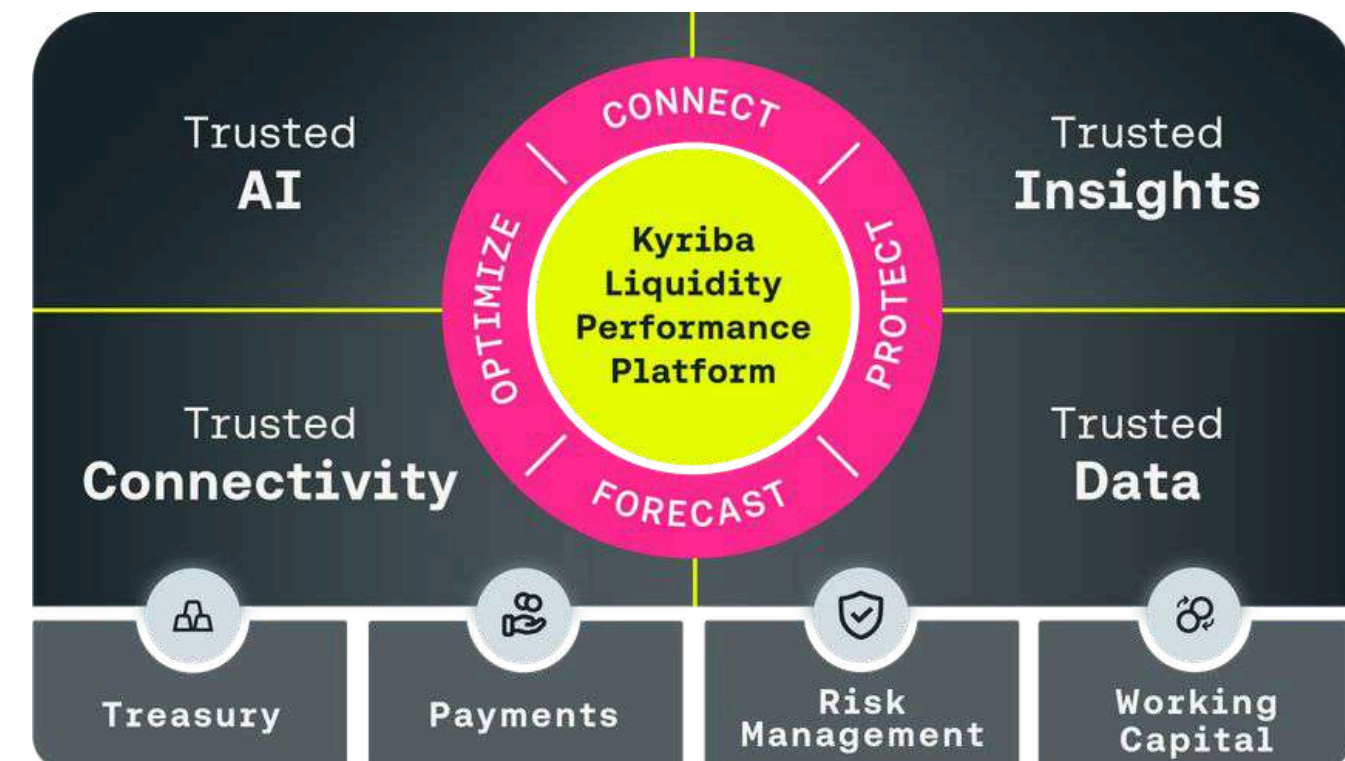

Solutions:

- Treasury & Cash Management
- Payments & Connectivity
- Liquidity Planning & Forecasting
- Risk Management & Hedging
- Working Capital Optimization

Optimizing liquidity, payments, and financial risk management.

By integrating payments, cash forecasting, and risk management capabilities, Kyriba supports CFOs and treasury teams in improving financial resilience and decision-making. The platform is designed to enhance transparency, reduce risk exposure, and optimize working capital.

Are you prepared to elevate your business? Let's go.

Thank You !
